

TASK 21 – PROMPTING ENGINEERING TECHNIQUES

1.Zero Shot Prompting

ChatGPT ▾

Evaluate the following resume and determine whether the candidate is suitable for a Data Analyst position.

Resume:
- Python
- SQL
- Excel
- 2 years of experience

Based on the information provided, the candidate appears to meet some basic requirements for a Data Analyst role, but there is not enough information for a strong recommendation.

Strengths

- **Python:** Commonly used for data cleaning, analysis, and visualization.
- **SQL:** Essential for querying and managing data.
- **Excel:** Widely used for reporting, analysis, and dashboards.
- **2 years of experience:** Indicates some practical exposure to working with data.

Missing Information

A typical Data Analyst evaluation would also consider:

- Experience with data visualization tools (e.g., Tableau, Power BI).
- Statistical analysis skills.
- Data cleaning and preprocessing experience.

2.One Shot Prompting

ChatGPT ▾

Resume:
- Java
- Spring Boot
- 3 years experience

Position:
Backend Developer

Output:
Suitable because the candidate has relevant backend development skills.

Now evaluate:

Resume:
- Python
- SQL
- Excel
- 2 years of experience

Position:
Data Analyst

Show less ^

Suitable because the candidate has relevant Data Analyst skills, including Python, SQL, and Excel, along with 2 years of experience.

3.Few Shot Prompting

ChatGPT ▾

Example 1:

Topic: Dragon

Story:

A young dragon wanted to fly higher than any dragon before him. After many failed attempts, he finally reached the mountain peak and proved that persistence leads to success.

Example 2:

Show more ▾

Story:

A helpful robot named Bolt wanted to make life easier for everyone in his town. He spent his days assisting people with their daily tasks and solving small problems. One day, when a storm caused a power outage, Bolt worked tirelessly to restore essential services. The townspeople thanked him for his dedication, and Bolt learned that helping others was his greatest purpose.

4.Role Based Prompting

ChatGPT ▾

You are a recruiter.

Evaluate the candidate for a Data Analyst position.

Please provide the candidate's resume or qualifications so I can evaluate them for a Data Analyst position.

For example:

Resume:

- Python
- SQL
- Excel
- 2 years of experience

Once you share the details, I'll provide an evaluation such as:

Suitable because the candidate has relevant Data Analyst skills, including Python, SQL, and Excel, along with 2 years of experience.
